

# PC-NET Graphics

Advanced PC-NET Software

## Features at a glance

- Standard 'Windows®' Based PC Programming
- Ad-Net and Ad-Net+ Compatible
- Choice of text, graphics and zoom facilities
- User Friendly
- Event and Alarm History
- Zoomed Graphic/Symbol Control

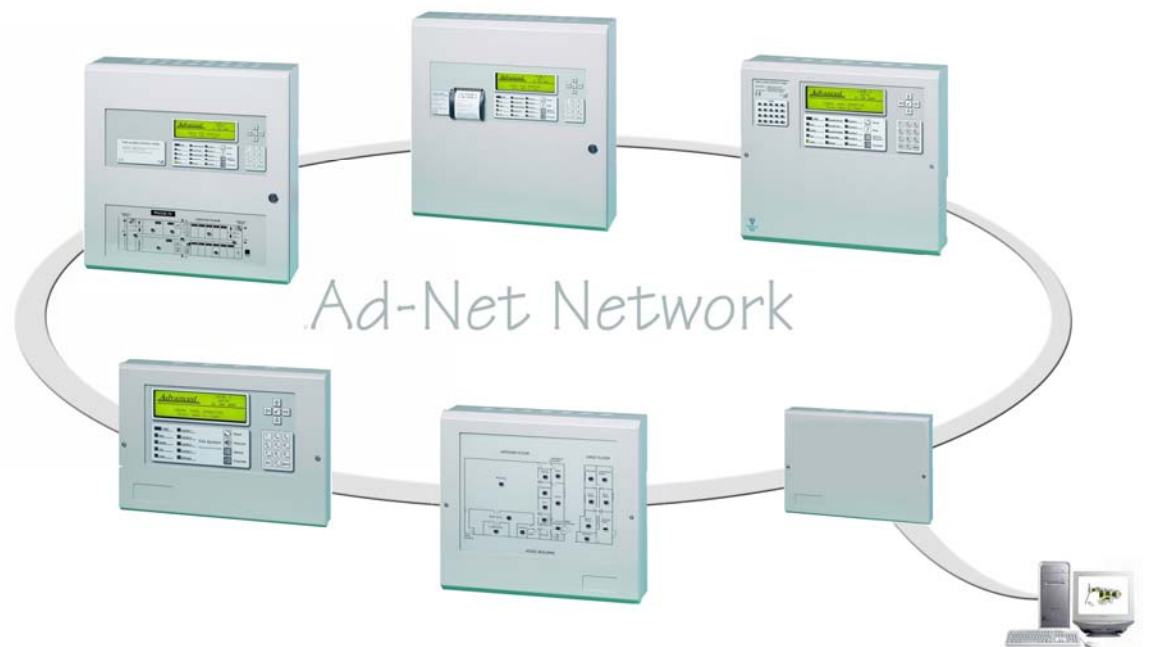

## Advanced Fire Panel Technology

The Advanced PC-NET Graphical Control System is highly configurable so that the end user can be presented with site maps, text and images in order to monitor the full fire system. Isolate and obtain analogue values by simply selecting icons and devices.

PC-NET Software allows unique auto and pre-configured software which enables the system to work in just 60 minutes without any additional configuration.

Cost effective for use with a single panel or Ad-Net network system.

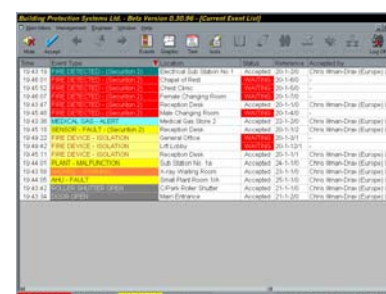

Powerfull Graphical control and indication with historic log and analysis features providing instant report by date/time as well as event type, sensor address and operation.
